

QUALITY ASSURANCE ENGINEER / MANAGER (F/M/X)

We are the largest full-service center for digital dental technology in Austria and a leading manufacturer of dental 3D scanners and software. Our modern company based in Bischofshofen is active worldwide and is looking for employees (m/f/x) for its success course who can drive us forward with your strengths.

Your Challenges

- Define the necessary quality measures within projects in co-operation with the project manager and system engineer manager
- Support and evaluation of the implementation of these quality measures
- You create end-to-end test plans
- You are responsible for the smooth implementation of the solution concept which is a 3D Dental Scanner according to the customer requirements
- You test the functionality, performance, reliability, stability and compatibility

Your Qualifications

- At least 4 years of professional experience in the field QA
- Good knowledge of common Quality Assurance methods, processes and tools
- You work in a problem-solving manner and are characterized by a precise, independent and structured way of working
- You are open minded, motivated to develop something new and innovative
- Strong communication skills in English, ability to work in an intercultural and agile environment

Our offer

- Flexible working hours, work/Life balance
- Collaboration with an international team of experts
- Direct responsibility and flat hierarchies in a young and open-minded business culture
- Canteen for lunch
- Accommodation (shared flat with furniture)
- A friendly team and a personal atmosphere
-

You can expect an exciting and responsible area of responsibility. We offer you a secure job with the social benefits of a modern company and performance-related remuneration. The minimum gross salary based on full-time employment for this position is EUR 48.983,20 per year. The actual remuneration is determined on a negotiation basis according to experience and qualification. Please email your complete application documents to:
